

BEE BOTS AROUND THE TOWNS

Scuola dell'infanzia Mago di Oz

Sezione 4 anni

a.s. 2017/2018

The project will last from December to the middle of March and is intended to make the children learn the basics of coding by sharing ideas and practice among the teachers of different countries.

PARTNER: Italia, Malta, Norvegia, Danimarca

SUBJECTS: Art, English, Coding, Robotic

AGE OF STUDENTS: 4-11

LANGUAGE: English

TOOLS: Videos, photos, chat, padlet, camera, diary, email, videocall, twinspace, forum, website

OBJECTIVES: Make the children get an idea of coding and learn the basics, cooperate, experience peer tutoring, grow awareness of the existence of other countries.

We also would like to inspire other teachers with a creative use of the little robots.

WORKING PROCEDURE: We intend to start the project by the beginning of December with ice-breaking activities linked to Christmas (songs and greetings) Every partner will upload material in the Twinspace twice a month. We will end the experience by the middle of March.

OUTCOMES: The main expected result is new knowledge about coding for the children and the opportunity to cooperate with teachers of other countries for the teachers.

The teachers who are directly involved in the project plan to involve other teachers from their schools in the practice of coding by using little robots
